

## 1.2 Transport and Unpacking

	<div data-bbox="778 250 858 322"></div> <div data-bbox="866 250 1107 300"><b>WARNING</b></div> <p>Observe strictly the instructions shown below. Failures to observe warnings and cautions could cause of serious injuries and damage/performance decrement of the equipment.</p>
---	---

<Transport procedure of the wooden box with the machine>

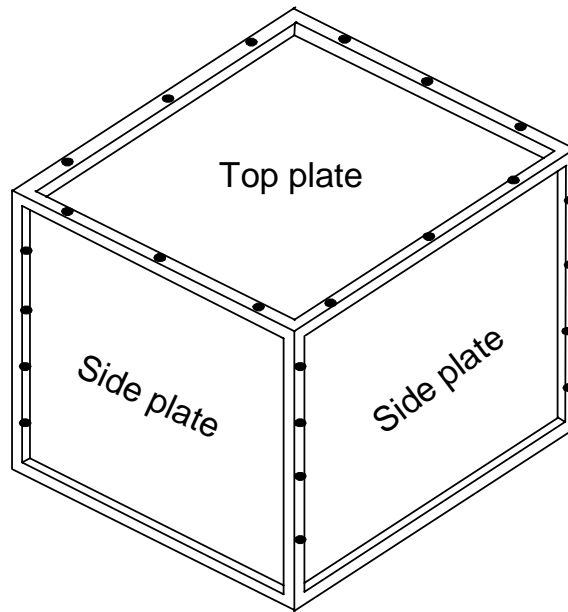

When using crane or forklift track

- Only qualified person is allowed to handle the crane or the forklift truck.
- Do not give strong shocks to the machine in the box to prevent damages.
- Insert the forks under the box, and protrude the forks from the backside of the box.

## 1.2 Transport and Unpacking (Continued)

<Unpacking procedure of the wooden box with the machine>

- (1) Loosen and remove the bolts fixing the top plate, and remove the top plate.
- (2) Loosen and remove the bolts fixing the side plates, and remove the four side plates.
- (3) Cut the vacuum-package with scissors.
- (4) Remove the vacuum package.

## 1.2 Transport and Unpacking (Continued)

<When carrying the machine with hand>

- Push the frame part to prevent deformation and damage.
- Do not give strong shocks to the machine to prevent damage of the machine.

<Removal of plastic wrapping>

Do not use the cutter knife. It may give damages to the machine. Use the scissor when you cut the plastic wrapping.
